"The Duke Steps Out"

With William Haines, Joan Crawford and Karl Dane

Gay, Glorious Youth!

A Romance of Young Blood, Its Thrills and Thrills

A CHAMP of the squared circle meets a winner among girls—he makes an amazing decision—and then the thing happens that you'd never guess.

Breezy Bill Haines was just made for the role of the gentleman prize-fighter! And you'd give up fame and fortune, too, if beautiful Joan Crawford was the girl of your heart! You'll cheer those fight scenes! You'll roar at the pranks of college life! You'll say this is one picture in a hundred!

Note, our picture show next week will be on Friday and Saturday

Coming

Canada's Fiscal Policy

Statement Approval by the 58th Annual General Meeting, Canadian Manufacturers' Association, Halifax, N. S., June 6, 1929.

In view of recent developments in the fiscal policies of all other leading commercial countries, in America and Europe, including tariff changes, export and import restrictions, bounties, subsidies, tax remissions, co-operative buying and selling, and other trade regulations and arrangements, conditions in Canada today should be carefully studied and any measures found necessary for the furtherance of Canadian interests should be provided.

It must be remembered that the improvement in agricultural and industrial conditions during the past three years has been due, at least in part, to the general international recovery from war, to the indirect influence of the prosperity of the United States, to three large crops sold at prices considerably higher than those of the moment, to the development of and activity in our great mining areas, and the cumulative effect of a long deferred programme of construction.

If these underlying factors become less favorable, it will be increasingly difficult for Canada to continue a policy of lowering customs tariff rates and eliminating other safe-guards, in the face of rising tariffs and restrictions throughout the world.

It seems, therefore, to be an appropriate time to ask, not for retaliatory measures or trade wars, which are usually futile and often harmful, but for constructive planning that will give the best possible results to the people of Canada. Canadians are intelligent, industrious and ambitious. Canada is particularly blessed with an abundance of natural resources which should be developed and utilized for the benefit of the Canadian people.

No country in history has been able to make substantial progress in building up a well balanced and prosperous state without establishing and maintaining a fiscal policy, including customs tariff rates, and import restrictions, which protected and safeguarded its agricultural and industrial production, as well as the people and capital engaged in various forms of enterprise. We are firmly convinced that no people will ever achieve such development without a reasonable policy of protection.

Therefore, it is imperative that Canadians, not in groups, but as a whole in their common interest, should unite in maintaining a fiscal policy which will enable those engaged in the great departments of production, viz., farming, mining, fishing, lumbering, and manufacturing, to enjoy continuous employment and which will ensure an adequate supply of capital.

A resolute and intelligent policy will protect and develop Canadian markets as other countries similarly protect their markets, reserving Canadian markets first of all for the products of Canadian workers, agricultural and industrial, instead of encouraging the importation of the products of the workers of other countries. Such a policy will administer our national estate to the best advantage. It will provide opportunities at home for the employment of our own people through the resulting increase of national production and prosperity. It will assist in negotiating trade agreements and in opening new markets abroad and it will strengthen Canada's position in the British Empire.

F. M. Watts leaves on Saturday morning on his holidays and during his absence W. H. Collison will have all mail connected with the Pool elevator here. Mr. and Mrs. Watts will spend their holidays on a motor trip, the destination of which is still unsettled.

MacLeod—Long

An interesting event to Champion and district is the marriage of Miss Ethel Long, youngest daughter of Mr. and Mrs. H. M. Long of Calgary, to Mr. John MacLeod of Hanna on Tuesday, July 2nd at 4 p.m. at the home of the bride's parents.

The bride who was given in marriage by her father was very lovely in a frock of rose dawn flat crepe and silk lace, made with a lace jacket reaching below the hip and a finely pleated skirt with the lace in insert, and having a pointed hem line. She carried a bouquet of roses and lilies of the valley.

The bridesmaid, Miss Emma Haslem was becomingly gowned in rose beige georgette made similar to that of the bride's with a longer coat. She carried a bouquet of pink carnations and mauve sweet peas.

The bride's mother wore a simple gown of black satin with a full length cascade of mauve georgette. She also wore a corsage bouquet of mauve sweet peas.

After the ceremony a delicious luncheon was served by Miss Haslem assisted by Miss Christie MacLeod, Mrs. Grant MacLeod and Mrs. J. A. Long. Immediately afterward the happy couple left by motor for San Francisco visiting Banff en route. On their return Mr. and Mrs. MacLeod will reside at Hanna.

W. I. Hears

Mrs. Martin

At the July W. I. meeting the main feature was an address by our constituency convener, Mrs. Martin, of Vulcan. This was on Institute work which was instructive and bright. Mrs. Martin urges all women with the vote to use it.

Two other unusual features were a shower of rain and a bill which was five dollars less than we expected. The lunch provided by Mesdames Bastin, McLean and Wise made us feel better still and the fact that the next meeting is to be a social afternoon at Mrs. McDougall's with Mrs. Ulrich in charge of the programme sent us home feeling extremely well pleased over everything.

Say folks don't miss "Submarine" this Saturday night.

Everyone is either taking their holidays or talking about them.

Ruth Jopling is spending her holidays at Milo the guest of her aunt, Mrs. Y. M. St. Peter.

The Old Timers are giving a dance open to all, in the Community Hall on Friday, July 19th. Don't forget the date.

Mr. and Mrs. H. Frame are now located in Brant, where the former is in charge of the Pioneer elevator.

There was a considerable movement to Calgary this week and to judge by local appearance the attendance at the fair will be the largest ever.

Messrs. Clever and Boss were visitors to Willow Creek recently and were very successful in their fishing efforts.

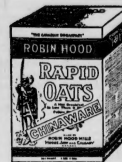

W. Harris assisted Roy Roberts during the week on the Exhibition grounds in a booth selling simplex piston rings.

Mrs. Williamson had a telephone conversation with her daughter, Thelma, at Brantford, Ont., the voices being transmitted very plainly.

General Conditions

(Bank of Commerce Letter)
 There is less unsettlement in business than was the case a month ago, mainly as the result of a stronger wheat market, improvement in the condition of most of the new crops in the eastern provinces, the continued favorable outlook for metal mining and the opening of the tourist season, which promises to be more profitable to Canada than ever before. Other strengthening factors are the prospect of building operations during the next few months on a scale at least equal to that in the summer and early autumn of 1928, and the excellent production record of the newsprint industry since a rational plan was adopted a few months ago.

While there is no great cause for satisfaction when the average price of wheat is still at a level close to the cost of production, the developments affecting the market for this grain have been more in Canada's favor than seemed probable according to the predictions last month of some authorities. The present price level is now in line with the world supply and demand. It is, of course, subject to change, either upward or downward, according to the progress of the new world crop; if, as is now indicated, the crops in some important producing countries should be smaller than in 1928, the price would probably advance. It is doubtful whether the new Canadian crop will reach the proportions of last year's but in all likelihood it will be of better quality, and, as was observed in the Monthly Commercial Letter for May, the harvest most to be desired in Canada is one of high quality and fairly large size rather than a bumper crop of low grade.

The automobile industry, which operated for some time at a record level, has found it necessary to curtail production sooner than was expected owing to a congested used car market and to a falling off in western trade, and the summer output may not be of normal volume. The allied industries have felt the effect of this early seasonal slackening. Many branches of manufacture, however, are still busy, some in filling orders for summer and fall trade, and others in making up a shortage of certain materials, the demand for which has exceeded the supply.

The major operators in the British Columbia lumber industry have found it necessary to consider the question of reducing their output, for while they have continued to work on a large production schedule in order to complete shipments arranged for during the winter and spring, some of the foreign markets have weakened to such an extent that little new business has been booked. The agreement among the eastern newsprint producers has brought about a greater improvement in the industry than was expected in so short a time; recently production has reached

a monthly average of about \$5 per cent of rated capacity, which would be regarded as satisfactory for any industry. Some seasonal slowing up may now occur, but it seems certain that the producers are in a comparatively strong position. The salmon canning season opens on the Pacific Coast with bright prospects. The carry-over from last year is sufficient only to supply the market until the new pack is available. The canners look for a large pack of high-grade fish, to be sold at about the same prices as prevailed for the 1928 pack, and if their expectations are realized the season's operations should be profitable.

British Columbia is raising the gasoline tax in that province to five cents per gallon. We have some other taxes in Alberta that could be copied, in fact a lot of them.

Governments and municipalities should not stress the weed menace too strongly until they set the example of eliminating their own properties. Country roadsides, vacant city property and park lands seem in too many cases to be weed-infested—Lethbridge Herald.

Henry Ford, in the July issue of the Ladies' Home Journal, says he would prefer, if he could make the choice, to have all his employees between 35 and 50 years of age. "For then," he adds, "we should have a stable and experienced force. We would not care how much over 60 the men were so long as they could do their work."

The contribution on some \$13,227 from the railway grade crossing fund as part of the cost of diverting certain crossings in the northern section of the province and eliminating 10 level crossings was authorized by the Board of Railway Commissioners in session in Edmonton during the past week. This amount represents 40 per cent of the estimated cost of these diversions, the remaining portion of the cost being borne by the Alberta Department of Public Works. Dangerous level crossings will thus be avoided on the Edmonton-Lloydminster highway near Chipman, on the Wetaskiwin-Hayter road west of Carmorse, on the Edmonton-Wainwright highway near Bretona and Fort

Saskatchewan and a diversion will escape two crossings on the Willingdon-Strathcona line.

Plans are announced by the Western Canada Airways for the opening of an office in Edmonton with Lieut. C. H. Dickens, holder of the McKee trophy, as district superintendent. This move is in preparation for northern expansion and the establishment of air mail service on the prairies during the coming fall. Two of the company's planes, it is stated, will fly on regular schedule between Edmonton and points on the Mackenzie River providing service for the far northern areas where much exploration work is being carried on.

The Calgary Exhibition and Stampede being held during the week of July 8 to 13 opens the season for summer fairs in the provinces. The Edmonton Exhibition and Pageant will occupy the following week. Dates assigned for Class B fairs are as follows: Lethbridge, July 17-20; Red Deer, July 22-24; Camrose, July 25-27; Vegreville, July 29-31; Vermilion, August 1-3; Lloydminster, August 5-7. The first of the Class "C" fairs will be at Benalto, July 16 and 17, and these will continue for the following two months finishing with Pridis and Millerville on September 18.

Alberta stood highest among the provinces of Canada with a per capita loss of \$5.74 caused by fires during the year 1928 according to figures compiled by the Dominion Fire Commission. The total fire loss in the Dominion during the year is given as \$102,097,849.

Pull Your Discs with Three-Fuel Power

Built for tractor power, the one-way-disc pulled by a three-fuel Hart-Parr cuts to full width at any depth. You need not just skim your land, for Hart-Parr power enables you to set the plow down where it belongs and keep it there. Two and even three one-way-disc plows are common behind the larger Hart-Parrs. They pay their way. Hart-Parr is the one tractor that develops tremendous power from gasoline, kerosene or distillate. We are now showing the improved 1929 line equipped with three forward speeds to speed up hauling and field work. Hart-Parrs are built for small, medium or large farms. Come in and see them.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

After a night of revelry at a New York uptown night club, Marcus, the famous revue producer, takes a party of four to Blackie Joe's downtown town, which stays open until sunrise. They are met by a "ringable table" by Al Stone, Blackie's chief comedian and singing waiter, who takes their order for beer. Al is unaware of Marcus's identity. Grace, the cigarette girl, is devoted to Al and really in love with him, but he does not know it. He orders for beer and on his return from the bar sees Molly, the ballad singer in her dressing room. He moves toward her as if drawn by a magnet. He is in love with her, but Molly is indifferent to him.

CHAPTER III

Al entered Molly's dressing room, depositing his tray of beers on a nearby stand. He forgot the drinks, forgot the party of fashionably dressed men and women who were impatiently waiting for them in the big room outside, forgot everything except the girl he adored—Molly.

He stood quietly by her side for a moment, saying nothing. And Molly, the ballad singer, continued dutifully the business of making up, as she sat before her dressing table. She wished to goodness that the singing waiter, who was always composing silly songs, would transfer his affections to someone else. But, finally, she couldn't escape the penetrating insistence of his eyes as he gazed over her shoulder at her seductively attractive reflection in the mirror. She turned her head with a sigh of resignation, and said ambiguously:

"Ain't love grand?"

Al did not know quite what she meant by that. If she were spoofing him, well, she could—he didn't mind. Whatever she said she couldn't prevent his loving her. But now her remark unlocked the flood gates of his speech.

"I can't help it, Molly, if I'm crazy about you," he whispered earnestly, coming still closer. "I've been that way ever since the first time I saw you. I think you're the most beautiful girl in the world—on the level, I do!"

Al longed to reach out and stroke her glossy golden hair; he wanted to catch her beautiful little white hands and pull her close to him. But he realized he couldn't do that now.

the corridor and saw his singing waiter in earnest confab with Molly. Blackie took the situation in at a glance, but decided not to bawl out Al. After all, when a man's in love, you must expect him to be bawling, reasoned Blackie. He stepped to the doorway and said, not unkindly:

"Come on, Al—on the job."

Al turned to his tray of beers but, before picking it up, thrust his precious song on Molly's dressing table before her.

"Read the words, please," he begged and, catching up his tray vanished.

Blackie Joe stood morosely in the doorway, one hand thrust into his trousers' pocket, staring after Al's retreating back. The proprietor turned to Molly.

"Molly, do your stuff tonight. Marcus is out in front."

Molly straightened as if touched by an electric shock. All trace of boredom vanished.

"Shut my mouth, Blackie! You don't mean it—not Marcus who puts on the show?"

"No one else but," said Blackie, nodding delightedly.

The glow in Molly's eyes was replaced by a cool, calculating stare. Marcus was outside—what an opportunity! Marcus, whose approval meant fame!

"Blackie," she begged, "introduce me!"

Blackie nodded—"Okay, I'll do that!"

Al leaned over, quick as a flash, and answered:

"Shut 'em! No loud—they'll all be wailing!"

Marcus turned away in annoyance. Al shouldn't wack back that way with such a man, thought Blackie.

It was all right with the regular patrons, but not with anyone like Marcus. But before Blackie could mouth things out, Al had picked up the glass and hurried off to bring a new beer.

At the bar doorway he again confronted Molly in her most gorgeous costume, garbed for conquest.

"Molly, did you like it?"

"Like what?"

"The song. Will you sing it?"

Molly's eyes flashed in sudden anger. "For heaven's sake, Al, let me alone!"

Al recalled that, after her lashing, she was all right with the regular patrons, but not with anyone like Marcus. But before Blackie could mouth things out, Al had picked up the glass and hurried off to bring a new beer.

(To Be Continued.)

Canadian Is Head Of Air Corporation

Graduate Of Toronto University President Of Largest Aviation Company

Clement M. Keyes, a native of Chatham, Ont., and graduate of the University of Toronto, is to be the largest aviation company in the world. This became known publicly with the announcement of the Wright Aeronautical Corporation, Curtiss Aeroplane and Motor Company, of which Keyes is president, and its affiliated companies.

The merger, which is to be effected through the formation of a holding company—Curtiss, Wright Corporation—brings together the business founded by America's three pioneers—the Wright brothers and Glenn Curtiss.

Curtiss Wright Corporation will have assets of \$70,000,000, but at current market values it will rank as a several hundred million dollar concern.

Mr. Keyes is to be president of the new holding company. Mr. Keyes who is 34 years of age, is of Irish and Welsh descent. Graduating from Toronto University in 1917, he came a few years later to New York. He entered newspaper work, but in Wall Street in 1921. In 1921, he established a bond business. From there he stepped into the aviation industry, becoming president of Curtiss Company.

Most Important

"I suppose there are many problems which Polar explorers need to solve?" said the unidentified man.

"Yes," replied the traveller. "A great many."

"What is the most important one?"

"Getting back."

Michigan has by far the greatest coastline of any state.

In Czechoslovakia 15,000 persons are engaged in tobacco growing.

Made Police Doubt

Finger Print System
Clever Crook Found Method To
Puzzle Police Of Three
Countries

The finger print as a means of identification has ceased to be a novelty. Quite apart from the ordinary use of rubber gloves, there is at least one man on record of a crook who threw doubt upon the whole international system of this method of identification. This criminal was Louis Chabouliere, a French doctor who disguised himself in the profession, served a sentence in prison, and then became a burglar. One outside the prison gates he set himself to the task of finding a method to thwart the finger-print system. He used his professional knowledge to secure a job in the School of Medicine at Lyons. There, with great skill, he contrived to take the prints from the thumbs and fingers of a corpse, being careful afterwards to hide his handiwork by applying chemicals that speeded-up decomposition.

He then mounted the skin on specially prepared parchment and set out upon a series of audacious burglaries. He deliberately left finger-prints of a known, but dead, crook. His method of using the gruesome device was first to press it against his chest and so madden the skin for the impress, and then lay it over various articles in the room where he had committed the burglary. Chabouliere confessed to all this on his death-bed; but not before he had given the police of three countries very grave reason to doubt the reliability of the finger-print system. The professional crook of today is very often a man of scientific attainments, but they are matched against equally clever brains.

MADE HER BABY
PLUMP AND WELL

Nothing makes a mother more grateful than a benefit conferred upon her child. Mothers everywhere who have used Baby's Own Tablets for their babies are quick to speak in enthusiastic terms of them. For instance, Mrs. Zeppherin Lavine, Three Rivers, Que., writes: "Baby's Own Tablets are wonderful medicine for little ones. They never fail to regulate a baby's stomach and bowels and make them plump and well. I always keep a box of the Tablets in the house and would advise all mothers to do likewise. Most of the ordinary ailments of childhood arise in the stomach and bowels, and can be quickly banished by Baby's Own Tablets. These Tablets relieve constipation and indigestion, break up colds and simple fevers, expel worms, allay nervousness and promote healthy sleep. They are guaranteed to be safe even for the youngest and delicate child. The Tablets are sold by medicine dealers or by mail at a box from Dr. Williams' Medicine Co., Brockville, Ont."

Private Telephone and Telegraph Office Part of Equipment

Very few people are aware that there is within Buckingham Palace a very completely equipped telephone office, together with a private telephone exchange. So great has been the number of enquiries here lately respecting the health and progress of the King, that it has become necessary to increase the staff under the direction of the royal physician, and for this work specially qualified officials have been selected.

Discover Old Dinosaurs

The skeletons of dinosaurs believed to be 90,000,000 years old yet well preserved, were discovered by Dr. Sven Hedin, world-famous Swedish scientific explorer, during his recent expedition to the Gobi desert, as reported on his return to Victoria, B.C., from Asia.

Use Miller's Worm Powders and the battle against worms is won. These powders correct the normal conditions of the stomach which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily associated with other refuse from the bowels. The medicine is helpful to the organs and the health of the child readily improves.

Like Tricenes in Peru, 12,044 feet above sea level, is the highest point in the world where steamers are found.

Minard's Liniment for Rheumatism.

Of the 12 biggest banks in the world eight are said to be British with five of them in London.

Has Overcome Handicap

How a 17-year-old Toronto boy, paralyzed since infancy and unable to write, dictated his matriculation examinations has been described by Premier Ferguson. He answered questions in the presence of the provincial registrar and is expected to obtain good marks.

"Your wife is talking of going to France this summer. Have you any objections?"

"No, certainly not, let her talk."

MADE IN ENGLAND

WINDOLITE The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic.

"WINDOLITE is the sun's most important ally."

Medical research has definitely proved that from the point of view of health and hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are actually excluding these health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied a long-cherished wish.

Exhaustive experiments have conclusively proved that it is a most effective substitute for glass that it freely admits the Ultra-Violet rays, and that its use produces the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Price \$1.50 Per Square Yard, L.O.B., Toronto.

Use WINDOLITE and let YOUR PLANTS and YOUR CHICKENS and YOUR CATTLE

Phillips' Milk of Magnesia
For Troubles Due to Indigestion
It is the most reliable and most effective remedy for all ailments of the stomach and bowels.
It is the most reliable and most effective remedy for all ailments of the stomach and bowels.

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best is Phillips' Milk of Magnesia, because it is harmless, tasteless, does not neutralize many times its volume in acid. Since its invention 50 years ago it has remained the standard with physicians everywhere.

Take a spoonful in water and your urinary condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. To prove this for your own sake, it may be said that Phillips' Milk of Magnesia is a sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians. Each bottle contains full directions—any druggist.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Bethly Alton, British ambassador to Brazil since 1925, died suddenly in a London hotel, aged 60 years.

Sheep from the famous flocks of His Majesty King George are being imported on Vancouver Island and will be pastured in the Sooke Hills. Two cargoes of Canadian grain have left Vancouver for Vladivostok. This is the first movement of this commodity to a western Siberian port in years. It is expected that a further cargo will go forward shortly.

London morning papers say the hand-shaken agreement between British and German film groups had been signed with involved capital amounting to approximately 60 million pounds sterling, or \$300,000,000.

Marius Pollon, one of the most noted military test pilots in France, was killed instantly when his plane crashed because of a broken wing. His parachute failed him after the pilot had leaped from the plane.

A children of grease, which overturned and ignited in the main gallery of the Hamburg-American line "Deutschland" furnished a stirring rush to an unenviable Atlantic crossing for 280 passengers.

Expanding trade in the New Westminister area is seen in the recent shipment of a large consignment of rope from the factory at New Westminster and canned milk from the Fraser Valley to the British West India market.

A Chinese-British agreement has been signed providing for the training of Chinese naval cadets in Great Britain and to the formation of a Chinese government of a British naval mission in development of the Chinese army.

Balmis's Limited, of Vernon, B.C., has started construction of the new dehydrating plant and it is expected that the factory will be completed in time to handle the local season's crop. Machinery is already moving in.

A shipment of purebred cattle consisting of 20 head of Guernseys purchased in Wisconsin and Illinois, by D. V. Runkle, of Regina, have been placed on the Pilot Butte stock farms near Regina. The shipment is valued at \$100,000.

Has Gained Popularity

Essay Contest Teaching Toledo School Children Facts About Canada

A Canadian essay contest, sponsored by Edmond G. Odette, M.P., for 12,000 Essex, has gained such popularity in that city that one of the newspapers is carrying a daily feature entitled "Facts About Canada."

"Canada," one of the Toledo papers pointed out, "is a nation of home-owners in the farming district, 78 per cent, of the people owning their own homes."

Other facts listed from day to day, deal with Canada's natural resources, its hydro power, its fishing and its industrial enterprises. The competition among the Toledo school children was started last fall when Mr. Odette, addressing the North Toledo Improvement association, offered to pay the expenses of a trip to Ottawa for the author of the best essay on "Canada."

The proposal received such a favorable impression in Toledo, that the chamber of commerce there offered to do likewise for a similar student. The object of the essay contest and the trip, is to promote a better understanding between the people of the adjoining countries.

"If all oyster eggs hatched and survived, in five generations their shells would make a pile twice the size of the earth."

THE FOUNDING FILM.

Producer: "Jump!" Actor: "But I see no mat!" Producer: "Of course, not. This is a sound film. We have to reproduce your third act on the pavement!"—H. 420, Florence.

A Pleasing Incident

Deaf and Dumb Children Are Entertained To a Lecture

This pleasing and pathetic little incident took place in Montreal recently—at the largest health exhibit ever shown in Canada, when the Canadian Social Hygiene Council assisted the Montreal Federation of French Health Agencies in a financial drive.

Morning, afternoon, and evening, health lectures were given, thousands of school children being carried free on the street cars. And one day they brought all the little deaf and dumb children in Montreal.

They gathered that silent company in the big lecture hall, and placed them in little groups of fifteen or so, around jury teachers. Each teacher faced the lecturer, and the children solemnly looked at their teachers. And then the lecturer began to speak to the children, while they stood, unhearing, and watched their teachers.

He spoke only a few sentences, and stopped. And all the teachers began to move their fingers, translating the lecture. The children's eyes followed eagerly as they understood the words that were being relayed to them, their own native language that they could not give touch with the world of their voiced playmates; their partial isolation was being temporarily broken down. To each of them, that lecture was a big event.

Children are notably fidgety at lectures, but not so these youngsters. To see how they enjoyed every minute of it was enough to bring tears to many eyes that watched them. They were being brought into closer touch with the world of their voiced playmates; their partial isolation was being temporarily broken down. To each of them, that lecture was a big event.

Recipes For This Week

(By Betty Barclay)

GOLDEN ORANGE FROSTING

- Grated rind 1 orange.
- 3 tablespoons orange juice.
- 1 teaspoon lemon juice.
- Yolk of 1 egg.
- Confectioners' sugar.

Mix grated orange rind with fruit juices and let stand 15 minutes. Strain into beaten egg yolks and add enough sifted confectioners' sugar to spread.

HAMBURGER EN CASSEROLE

- 2 lbs. of round steak ground
- 1 lb. of lean hamburger.
- 2 large onions.
- 2 large peppers, green or red.
- 1 large lemon.
- 1 S. or bottle tomato catsup.
- 1 lb. or more of bacon according to taste.

Salt and pepper.

Butter your casserole dish or pan, and lay about 1½ inches of hamburger in bottom.

1 layer of one onion thinly sliced.

1 layer of one pepper thinly sliced.

Juice of half lemon.

Salt and pepper to taste.

Repeat until the meat is used, making the second layer of meat about one inch thick, this will give enough hamburger left for about 1½ inch thick on very top. Pour a whole bottle (8 oz.) of catsup over and stir. Bake slowly or in modern oven for one hour and a quarter.

Early oil wells at Baku were scooped out by hand.

COL. CHAS. LINDBERGH AND HIS BRIDE

Photograph shows Colonel Charles Lindbergh and his bride, formerly Miss Anne Morrow, daughter of D. W. Morrow, United States ambassador to Mexico, at Mitchell Field, L.I., where they witnessed the test flight in the Daniel Gutzwiller sail-aircraft competition. This is their first appearance since their marriage on May 27. Col. Lindbergh is a trustee and consultant of the Daniel Gutzwiller Fund for the promotion of aeronautics.—Copyright, 1929, Pacific and Atlantic Photos, Inc.

Out Of Their Element

Ekimov Boys Cannot Stand Climate Of Eastern Canada

Ben Ell, nine-year-old son of Chief John Ell, head of the Southampton Island Eskimos, and Sam Proddy, who has been endeavoring to learn the ways of civilization at Lakenhead preparatory school, near Peterborough, Ont., have been forced to give up their studies there and hurry home on account of illness.

Ben and Sam soon became favorites at the Lakenhead school where they had been for two years, but just before Christmas both were forced to relinquish their studies to face an ordeal of sickness. Influenza, pneumonia, measles, tonsillitis and operations for tonsillitis and adenoids proved too grueling a test for little Ekimov constitutions and it has been decided to send them back to their northern home.

Evidently Not

In a small country town they were discussing the question of a brighter Sunday.

Various proposals were put forward, and some daring soul suggested a Pleasant Sunday Afternoon. A dignified old lady rose in the meeting and said: "There will be no pleasant Sunday afternoon where I am."

Rush For Homesteads

Homesteads are being filed on at the rate of 100 a week in the Edmonton Land Office.

PREMIER FERGUSON CHRISTENS AEROPLANE

Premier Ferguson, of Ontario, christening the "Imperial," a Gypsy Moth plane, presented to the Aviation League of Canada by Imperial Oil Limited, at the opening of the Hamilton Airport recently. The plane is being used by Major-Gen. J. H. Macbride, C.B., C.M.S., D.S.O., in his travels about the country in the interests of aviation.

SUNDAY SCHOOL LESSON

JULY 14

EZEKIEL TEACHES PERSONAL RESPONSIBILITY

Golden Text: "Each one of us shall give account of himself to God."—Jonah 1:12.
Lesson: Ezekiel 18:1-32; 33:1-20.
Devotional Reading: Psalm 123.

Explanations and Comments

The Prophet's Responsibility, verses 7-9. Ezekiel is set out as a watchman unto the house of Israel. He must hear the word of Jehovah and he must proclaim it for as a watchman he is responsible for warning the people of the consequences of sin. He must know that God punishes wickedness, and he must warn the wicked from his way. If he fails in his duty of warning and the wicked man dies in his iniquity, the prophet is "blood guilty," accountable to God for that man. If, however, the prophet warns the man and the man fails to heed him, the prophet has "delivered his soul." He is free from guilt in the matter. His was the responsibility, not of producing obedience, but of uttering the warning. Recall how Paul declared to the elders of Ephesus that he shrunk not from declaring unto them anything that was profitable, and taught them publicly, and from house to house, testifying of Jews and to Greeks repentance toward God; wherefore he testified unto them that he was pure from the blood of all men, for he had ceased not to admonish every one earnestly and day with tears, Acts 20:17-31.

No one of us is free from the danger of taking spiritual obligation too lightly. If we are Christ's disciples at all, there is committed to us the work of reconciliation. We are put in trust with a gospel, and are intimately connected with the destinies of men. It is within our power to speak words which make eternal difference to those who hear them, and upon our faithfulness may depend their opportunity of realizing the only way of escape and life. And yet how often are we content with something much less passionate than the service of a true watchman?—J. Stuart Holden.

Heating By Radio

Centralized Stoves No More Impossible Than Sending Music Around World

While some, perhaps many, of the wonders prophesied for days to come may be far-fetched and foisted on a glibble public, all the amazing triumphs of the modern age were once in the similar case. Had anyone foretold the coming of radio not so long ago, the world would have been in portion. So the telephone was a miracle in its day, and the typewriter had to fight its way into universal use. Who could have foreseen the place the automobile was destined to occupy from its first examples or induced people to believe that white coal could be harnessed for the service of mankind. Now we are told that radio will bring light and power to our homes and industries and provide heat as well. Centralized stoves instead of central heating plants are no more impossible than sending music round the world without visible agency.

Just one stove for the entire city and that raised 1,000 feet in the air, is the possibility announced by Paris, France. The scheme entails the establishment of wireless energy to be sent from the top of the Eiffel Tower. In each house there would be set up a machine, like, yet unlike a radio, that would intercept the waves, transform them into heat and become a radiator to warm the rooms. The proposed waves would be of 100 to 300 volts in waves of two to three meters length. All this is needed is to place on the receiving posts a filament that the wireless flow will induce to vibrate, and you will have your stove unit. Given enough such filament units, and you have your heating or cooking stove minus coal, oil, gas or electric electricity.

Sale Of School Lands

Greatest Interest Shown In This Year's Auction Sales Held In West

Unprecedented interest was manifested in this year's auction sale of reserve school lands in Saskatchewan and Alberta. Attendance at the various points where sales were held was high, and reached 1,000 at some points. Many farmers acquired additional land adjoining their present holdings for the purpose of extending their operations, or to make provision for their sons. Many of the buyers of these lands were "new Canadians" who have prospered in western Canada.

In all, some 738,000 acres of land were sold, for a total of \$10,928,225. Prices paid ranged all the way from \$8 to \$70 an acre. In Saskatchewan, 4,662 parcels were sold, the average price being \$12.24 per acre, and in Alberta 63 parcels, the average price being \$13.33 per acre. Two of the heaviest sales were at Assiniboia, Sask., where \$1,600,000.00 was realized, and at Roseston, Sask., where \$1,216,000.00 was taken.

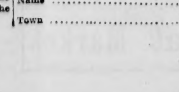

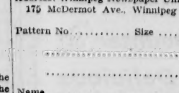

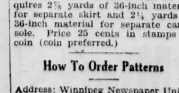

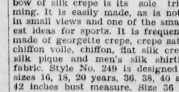

Grandmother Says

"That when she was a wee, tiny baby and her mamma had not have enough milk to nurse her, she gave her Eagle Brand Milk, which made her grow up healthy and strong."

The high quality, uniformity and economy of Eagle Brand make it the first choice for cooking and table use.

If your baby is not gaining in weight as it should—if it is fretful or restless—something must be the matter with it.

In this paper from time to time you will find an advertisement of Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company, Limited, 140 St. Paul St., West, Montreal, and they will send you, free of charge, a very helpful baby welfare book, containing authoritative feeding directions and a vast amount of useful information on the care of baby. Also ask for Baby Record, a diary of baby's progress.

LEVEL CROSSING ELIMINATION'S BEING PLANNED

Ottawa.—The Board of Railway Commissioners, the road departments of the Provincial governments throughout Canada and the railways of Canada are making a joint survey of the level crossings situation with a view to a definite and comprehensive program of level crossing elimination.

The provincial officials are now engaged in classifying the crossings from the point of view of the degree of danger and the nature of the protection needed. When this has been done, the board, the provinces and the railways will confer and decide where the greatest urgencies lie. The most dangerous crossings will be eliminated or protected first.

The program to be drawn up will range from half a million to a million dollars a year from federal government, which means an expenditure of two to three millions annually. The grade crossings which have been replenished at the rate of \$200,000 a year for many years in proving inefficient since the campaign of the last few years inaugurated by the Hon. Charles Dunning, minister of railways. At present it is down to about \$120,000 and Mr. Dunning will probably ask Parliament next session to increase the \$200,000 to the larger amount.

Under the provisions of the Federal government the fund, which is administered by the Railway Board, will pay up to 10 per cent of the cost of any crossing elimination and protection.

Father Sought By Radio

Message Sent To Police Officer In Far North To Advise Him Of Son's Illness

Ottawa.—A sick child in a hospital here is waiting reply from his father at the lonely Royal Canadian Mounted Police post at Chesterfield Inlet on Hudson Bay, to a message broadcast over the Canadian National Railways Radio chain.

The message was to advise Staff Sergeant M. A. Joyce, that his 14-year-old son, Scott, is seriously ill here, and asking him to get in touch with Ottawa by radio if he can get to a sending station.

World's Population

Believe Population Will Be Doubled In Next 150 Years

Chicago, Ill.—Mankind probably will require at least 150 years to double the world's present estimated population, which is between 1,700,000,000 and 1,800,000,000, if fertility and mortality remain as at present. A mere doubling of the world's population, however, will produce a striking change in the race composition, with a greatly increased percentage of blacks. The population of North America, Western and Northern Europe, and Australia even now are no longer reproducing themselves.

Tourists Pay Safe

Windsor, Ont.—"Don't shoot. I have no use in this car." Banners bearing this inscription were pasted on the windshields and rear windows of automobiles reaching here from Chicago and other Illinois centres. It evidently constitutes a novel manner of protesting against the alleged promiscuous shooting of "bootleg" suspects by American state police.

Rumor Is Denied

Ottawa.—A rumor that Canada has made an offer to the Newfoundland land government for the purchase of Labrador was given official denial here. "In no way is it true," said Premier King, when the matter was brought to his attention. The rumor indicated that the price offered by the Dominion government was one hundred million dollars.

Hon. Heenan Will Go To Edmonton Edmonton, Ont.—Peter Heenan, federal minister of labor, will be in Edmonton shortly to sign in behalf of the Dominion government the necessary documents and agreements in connection with the old age pensions scheme, which is to go into operation under the joint auspices of the two governments.

Non-Party Delegation

London, England.—With the decision to send a non-party delegation to the league of nations assembly in September, it became known that Viscount Cecil would probably be one of the delegates.

W. N. U. 1793

State Control Of Radio

Royal Radio Commission Makes Important Recommendations

Ottawa.—Government control of all broadcasting stations, elimination of advertising from the programs and of licensees—pay the upkeep by licensees—were advocated by the Royal Radio Commission at its first session here by the All-Canada Congress of Labor and the Canadian Legion of the British Empire Service League.

The Canadian Congress representatives also recommended that the present commission be continued or a similar organization be established with complete administrative control of radio broadcasting.

The Canadian Legion advocated a broadcasting organization that would develop imperial patriotism and Canadian culture. Canadians said the Legion briefly were being overwhelmed with foreign propaganda.

The commission will at once begin the preparation of its report. It will probably be available about the end of the month.

Canada May Consider Relations With Russia

Communications From British Government Have Been Received

Ottawa.—Certain communications of a "general and preliminary nature," regarding the signing of the optional clause, and also bearing on recognition of diplomatic relations with Russia, have been received by the government of Canada from the British government, that was the extent of the information given out here with respect to these matters which are accorded specific mention in the King's speech at the opening of the parliament.

Just what position the Canadian government is taking on the question of resuming relations with Russia has not been stated. It is considered likely, however, that Canada will support any such move.

Two Injured In Explosion

Faulty Water Jacket Burst In Jewish Orphanage, Winnipeg

Winnipeg.—A violent explosion, which shook buildings within a half a block radius, caused injury to two men and damage to the basement of the Jewish Orphanage, on Matheson Avenue, north Winnipeg.

Many children are cared for at the orphanage, but all escaped injury. While a city water works employee was attempting to repair a faulty water jacket in the basement it exploded. The employee, George Bennett, was painfully hurt, while Mrs. G. Gervais, wife of the orphanage superintendent, suffered from arm injuries and shock.

CROP CONDITIONS ARE VARIABLE REPORT REVEALS

Ottawa.—The telegraphic crop report issued by the Dominion bureau of statistics showed a wide range of conditions across the country. Crop prospects continue satisfactory over Southern and Northern Alberta. Warm weather with plenty of rain is needed in Saskatchewan and Manitoba. Fall wheat is excellent in Ontario. Scarcity of rain also is reported from Nova Scotia. The largest strawberry crop is expected in the history of British Columbia. Favorable conditions are reported from Nova Scotia. The largest strawberry crop is expected in the history of British Columbia.

Reports by provinces for the end of June:

Manitoba.—Manitoba department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

Saskatchewan.—Saskatchewan department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

Alberta.—Alberta department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

Ontario.—Ontario department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

Quebec.—Quebec department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

Atlantic Provinces.—Atlantic department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

British Columbia.—British Columbia department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

Yukon.—Yukon department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

Nunavut.—Nunavut department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

Northwest Territories.—Northwest Territories department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

Southwest Territories.—Southwest Territories department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

East Territories.—East Territories department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

West Territories.—West Territories department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

Central Territories.—Central Territories department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

South Territories.—South Territories department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

North Territories.—North Territories department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

South Territories.—South Territories department of agriculture.—Crops started late on account of cool spring. Light rains in fall left little soil moisture this spring. Germination fair. Slight setback to few fields by frost on June 12. Rain-fall scattered and variable. Need heavy general rain over province. Prospects fair.

PARLIAMENTARY SECRETARY

Miss Susan Lawrence has been selected as parliamentary secretary to the Minister of health by Premier Ramsey MacDonald, according to the list of appointments to the junior cabinet posts.

Gold Rush Started

Report Of Strike In Northern Saskatchewan Causes Excitement

River, Sask.—The placer gold and platinum strike about 200 miles north of Big River is causing considerable excitement at this point. Above 400 from other points have gone to the scene of the new find. A number of parties are now outfitting at this point and will leave by large and canoes this week.

The principal find is reported at Frothingham Lake. An old prospector who just arrived here from the scene of the strike to secure supplies reports that when he left over 300 claims had been staked around Frothingham and Rich Lakes.

The route to the new placer field is by water, the entire distance being without portage, via Big River, Lake La Crosse, Lake Deep River, Clear or Churchill Lake. All kinds of reports are coming in as to the richness of the new finds, one report stating that 817 was washed from one shovel of dirt.

Envoy To Japan

Hon. Herbert Markie Will Deliver Several Addresses In West

Ottawa.—Places at which Hon. Herbert Markie, Canadian minister designate to Japan, will speak on his trip west from Montreal on July 14, have been announced here.

On his way to British Columbia, Mr. Markie will speak at Toronto, Oshawa, Hamilton and Port William, Winnipeg, Regina, Calgary and Jasper Park. In British Columbia where he will spend most of his time before sailing on August 29, he will speak at Vernon, Nanaimo, Duncan, Port Alberni, Kimberley, Kootenay Landing, Penticton, Windermere, Kelowna, Kamloops and Victoria.

Discovers Liquor Cache

Aeroplane Flies Up To Barrels Of Rum With Tail Skill

Sydney, N.S.—Flying up 20 barrels of rum with the tail skill of his plane was the unique experience of Major-General J. H. Macdowell, when engine trouble drove him into a forest landing on a farm near here.

The cache was nearly hidden under stumps covered with soil, and had the pilot dropped a wheel into the pile of stumps he might have strangled it, the results might have been serious for the pilot and his guest, Dr. Freeman O'Neil.

Prince Sails For Rome

Prince Henry Given Enthusiastic Send-Off At Quebec

Quebec, Que.—Prince Henry, Duke of Gloucester, concluded a month's visit to Canada, when he sailed from this port on the "Empress of Australia" bound for England. A flag draped ship and the presence of the Governor-General, Lord Willington, and Lady Willington on the dock heralded the Prince's departure, while citizens of the ancient capital thronged in large numbers and gave the King's fourth son an enthusiastic send-off.

PLAN TO SOLVE LABOR PROBLEMS IN GREAT BRITAIN

London, England.—In debate on the address in reply to the Speech from the Throne, Mr. H. H. Thomas, Lord Privy Seal and minister of employment in parliament outlined the government plans for reducing the volume of unemployment in Great Britain.

Schemes must not be considered as a mere novelty to giving work, but also from the standpoint of stimulating trade at home and abroad, he declared. "What we import we must make for ourselves," he asserted amid cheers from the opposition benches.

Mr. Thomas continued that the railways imported wooden truck sleepers when examination had shown that only technical difficulties prevented them from using steel sleepers which could be made in Britain.

He outlined schemes costing \$187,500,000 and providing work for five or six years would be speeded up, Mr. Thomas said, adding that the government's contribution would be paid out of the road fund.

Arrangements would be made for the reconstruction of the Waterloo Bridge on which depended the great Charing Cross bridge scheme which would involve expenditure of \$1,500,000. Other schemes would be submitted to the railway companies for the electrification of the Great Northern Railway, suburban lines running out of Liverpool Street station, tube extensions, improvements in docks and harbors, and a new railway around outer London to avoid cross-London traffic.

The natural resources of the country would be developed, including land drainage, forestation and fisheries.

Mr. Thomas declared he was seriously considering a proposal to make Scotland more attractive and thereby enable "our American cousins to see the birth of the Scots," a statement that caused laughter.

Mr. J. H. Thomas announced he was going to Canada when Parliament rises at the end of the present month to discuss with the Canadian Government the subject of British migration to the Dominion.

The minister stressed that in any discussion of migration with the Dominion, nothing would do more harm than the suggestion the British wanted to solve her unemployment problem at their expense.

"They will resent it and resent it bitterly," he said. "I believe migration is a problem that has to be regulated on the spot. It is something which has to be discussed in all its bearings, because anyone who visited Canada as I know I do, I know it, knows perfectly well the remarkable change from an agricultural to an industrial population that is taking place there."

"Hitherto our migration schemes have been based on the assumption that agriculturists alone were wanted. That is not true today. Equally, labor has been safeguarded in position by saying 'no, we are not going to have people forced on us to lower and break down our standards.'"

"I propose to visit Canada myself immediately the House rises to discuss the whole problem."

VISCOUNT CECIL ON DELEGATION TO GENEVA

London, England.—Chairs from the Labor benches greeted the announcement in the House of Commons of the appointment of Viscount Cecil again to represent Great Britain at the Preparatory Disarmament Commission of the League of Nations and to attend the forthcoming assembly of the league.

The league assembly delegation also will include the following: Right Hon. Ramsey MacDonald, prime minister.

Right Hon. Arthur Henderson, secretary for foreign affairs.

Right Hon. W. Graham, president of the Board of Trade.

Viscount Cecil, who was under-secretary of state for foreign affairs and minister of blockade in the war-time coalition government, and later became Lord Privy Seal in the Baldwin Conservative government in 1923 and 1924, has had considerable experience at Geneva as a British spokesman. He resigned from the disarmament delegation of the coalition government in 1921 when the collapse of the tripartite naval conference at Geneva was in sight.

A protest was raised from the Labor benches after Mr. Henderson had announced the delegation. The Conservative members said it was their first occasion, when the president of the delegation, Viscount Cecil, was a British representative.

Mr. Henderson claimed, in reply, that by Viscount Cecil's inclusion, he had fulfilled the undertaking to follow the precedent of 1921 when the delegation was not strictly of a party basis.

Mr. Henderson continued, in reply, that by Viscount Cecil's inclusion, he had fulfilled the undertaking to follow the precedent of 1921 when the delegation was not strictly of a party basis.

Mr. Henderson continued, in reply, that by Viscount Cecil's inclusion, he had fulfilled the undertaking to follow the precedent of 1921 when the delegation was not strictly of a party basis.

Help Yourself
Here's a little advice to the young men: The average college student lives in only about 600 hours of actual study per term of nine months. Anyone who really wants to gain an education, of any kind, can do so by studying that many hours in his own home after work.

We have one of the 1929 16 ft. Swabber set up for your examination. Come in and look it over.

And here's a little advice to the young ladies: Don't trust a husband too far; nor a bachelor too near.

Don't forget the Old

Time's dance on July 15th. They are going to entertain the New Timers.

A cook is a charitable institution, providing food and shelter for needy pilgrims.

We have a real good buy in a 1927 Chevrolet coupe and a 1929 Ford coach. Ask us to see these cars.

Victor—Will you kindly tell me if a man belongs to your club with one leg named Walker? Doorman—I don't know sir, but I'll find out. What was the name of his other leg?

We feel that we represent the farmers of this community, and we always consider it an honor to be consulted about agricultural problems.

Wm. Penn Motor Oil "Still the Best."

The "high-high" gear of International "Six-Speed Special" cuts round-trip time down to the minimum. "Low-low" steps up pulling power to the maximum. Ask F. DeLuca for this new "Six-Speed Special."

LOCAL AND GENERAL

Don't miss the Tree Planting Car on Monday.

Found—Child's tan sweater at grounds on July 1st. Owner call at Chronicle office.

The Old Timers are celebrating the town's anniversary with a dance open to all.

Mrs. Harry Smith received the sad news of the death of her father at Toronto, Ont., on Saturday.

A Kramer and family left for the coast on Monday via motor car. The trip will be a camping one.

F. J. Whitmarsh, teacher of the Bow Valley school, left for the east during the week where he will spend his holidays among the Thousand Islands.

Mrs. J. M. Moffatt was very successful at the Calgary Exhibition, capturing a large number of prizes in fancy work.

Don't forget next week's picture show is changed to Friday and Saturday night (The Duke Steps Out).

"Uncle Tom's Cabin," the big super special picture costing two million to make, comes to the Champion theatre Thursday and Saturday, July 25th and 26th.

Mrs. E. G. Millin wishes to thank the B. P. O. E., Champion W. L. Mrs. Ulrich, Mrs. Bond and George Campbell for flowers sent during her recent illness.

The evening service in the United Church will be withdrawn for July 28 and Aug. 4, as the pastor and family will be leaving for Turf, Sask. on July 17th. Sunday school at 11 a.m. will be continued throughout the summer as has been the custom.

Alberta will again be advertised this season by an exhibit of agricultural products and natural resources to be shown at a number of state and county fairs through the middle western States. Arrangements have been completed by the Publicity Branch of the Department of Agriculture to show this display at fairs in Minnesota, Iowa, Nebraska and Kansas during August and September. A marked increase in the interest shown in the opportunities for settlement in Alberta and in emigration to the province is reported from the localities in which similar exhibits have been shown during the past few years.

Tree Planting Car Here July 15th

The Tree Planting Car of the Canadian Forestry Association now on its tenth annual tour of the Prairie Provinces, which is working during the month of July in Alberta will be in Champion on Monday, July 15th with a radio concert, a radio talk on Trees, and moving pictures in the evening at 8 o'clock. Fitted out with an entirely new set of pictures including a real good camera, and other equipment it is attracting large crowds this year, and in the past three months working in Sask. over 20,000 people have visited it during the day and at the meetings held. During the day the Car will be open for any who wish to drop in to discuss their tree problems, and during the tour to date many have taken advantage of this, with the result that those in charge of the Car have been busy during the day answering questions. A great deal of interest is being shown this year along this line more farmers and townspeople realizing the benefits derived from them.

The Vancouver Province, a Conservative newspaper, is not in sympathy with those Conservatives who are urging a policy of retail retaliation against the United States. It considers that such a course would not only be useless but dangerous. The "brick-bat-brick" policy, it says, is so good because it is not going to help the people who will be injured by the American tariff. If anything, it will do them more harm. It is dangerous because it will lead to a tariff war and in a tariff war between a nation of 100,000,000 and one of 10,000,000 the chances are just about ten to one that it is the smaller that will get hurt. Besides, trade is not everything between Canada and the United States. Other relations have been friendly in the past, and it is to the interest of all concerned, the Province argues, that they shall remain on a friendly footing. This pre-supposes the retention of good temper on the part of Canada, no matter what happens at Washington.—Leithbridge Herald.

Miss Ferné Bond Is "Showered"

Miss Ferné Bond was the guest of honor at a miscellaneous shower held at the home of Mrs. W. C. Hoskins. There was a large turnout and Miss Bond was the recipient of very valuable and useful presents, which were delivered to her on a tea wagon drawn by little Marcella Hoskins. Dainty refreshments were served during the evening. Miss Bond's wedding to Jas. G. Walker is announced for Friday, July 12th, in the United Church.

The town was practically deserted this week at times, everyone being at the Calgary exhibition.

The continued dry weather is taking toll of the stubbled in fields of grain, but the summer-fallow is standig up well.
